Introduction

Since its formation in 1984, CMD has consistently transformed the way we integrate power and technology with furniture in the commercial workplace.

As a true manufacturer, with a strong emphasis on quality, service and innovation, we pride ourselves on offering a full range of power distribution and connectivity from below the floor, through to the furniture and above the ceiling in the commercial office environment.

We are inspired every day by the genuine belief that we can supply a range of products that will change your environment for the better - Connecting Power, People and Organisations.

Over the last 5 years, CMD has doubled in size and 2019 sees the launch of several exciting new products that will further support and drive our continued growth.

Audacy wireless lighting control, our Capsule on desk module and new additions to our Reach monitor arm range are just a few of the new product initiatives that we're excited to bring to the market.

Bespoke Solutions

CMD prides itself on being a Solution Provider, therefore in addition to providing ergonomic, power module, power distribution and lighting control solutions from our standard range, we also provide a comprehensive 'Bespoke Solution' service, incorporating Power, Data, AV & ergonomic components in a wide range of unique and innovative configurations.

As a result of ongoing investment in the latest manufacturing CNC punching and forming technology we have the ability to design and manufacture bespoke solutions, from simple bracketry to complex customer specific designs, at our manufacturing facility in Rotherham ensuring we meet the highest quality standards and lead times.

Our specialist engineering team span multiple disciplines and are united by their shared enthusiasm for quality solutions to the latest national and international standards.

We deliver a range of products and solutions which include:

- Power (UK and International configurations)
- USB charging
- Audio and Visual options (HDMI, VGA, Phono and much more)
- Data transfer
- Cable management systems
- Lighting distribution
- Protection
- Switching
- Underfloor power distribution

We are extremely proud of our heritage and have been producing customer led solutions since 1984. The images below show products that were specifically designed for clients who needed a unique solution that we were unable to provide from our standard product range.

Monitor Arms

Reach

This stylish monitor arm, arguably one of the slimmest of its type on the market today, is available in silver, black and white and comes complete with quick release VESA, Top Fixing and Split C clamps, through desk and 80mm grommet hole fixing kits as standard. The arm tension can be adjusted quickly using a simple Allen key system to support monitors ranging between 2kgs to 5kgs and 3kgs to 8kgs, which covers most popular brands.

Paddle release system

10 YEAR WARRANTY

Quick release VESA compliant 75mm and 100mm

Integrated cable management

ERGONOMICS EXCELLENCE FIRA

Integrated cable management

C clamp, through desk and grommet fixing kits included

Features

- An integral spring counterbalances the weight of the screen allowing fingertip adjustment to the desired working position
- Each arm support monitors between 2kgs to 5kgs and 3kg to 8kgs
- The arm can fold flat into 80mm of space
- Quick release VESA with industry standard 75mm / 100mm VESA mounting plate for attachment of monitors
- The arm features an integral cable management system
- Includes Top Fixing and Split C clamps, through desk and grommet fixing kits designed to fit a range of desk thicknesses

Cygnus and Razor Mount

Cygnus® is a design classic and features a unique blend of innovative engineering and style. Cygnus® is now available with our Razor Mount as standard, making it the perfect solution for double screen use, with a *combined weight range of 8kgs to 14kgs. Cygnus® is available in silver and white and comes complete with quick release VESA, C clamp, through desk and grommet hole fixing kits.

*The combined weight must include the Razor Mount and two flat screen monitors.
Industry standard 75mm and 100mm VESA mounting rail

Quick release mechanism

Arm supports between 8kg - 14kg

MADE IN SHEFFIELD

Integrated cable management

### Features

- An integral gas strut counterbalances the weight of the screens allowing fingertip adjustment to the desired working position
- The dual-position forearm can be set at 15° or 45° positions to extend the operational range of the arm giving a maximum height of 523mm and a maximum reach of 476mm to the centre of the VESA plate
- The arm can fold flat into 80mm of space
- The quick release mechanism, with a locking feature, allows the Razor Mount to be fitted and removed without having to remove the monitors.
- The Razor mount has an industry standard 75mm and 100mm VESA mounting rail to support a range of monitor sizes
- The arm features an integral cable management system
- Includes C clamp and through desk fixing kit

CPU Supports

Enclose

Enclose is simple to install and a robust solution for keeping the CPU out of the way and free from damage.

Features

- Adjusts to support a range of CPU sizes
- CPU dimensions range:
  280mm - 380mm (H) x 55mm - 125mm (W)
- Supports CPU weights up to 8kg - subject to desk material
- Available in silver with black plastic mouldings
- Simple to install
- Comes complete with a slide and rotate mechanism

Slideable with 360º rotation

Adjustable bracket supports CPUs of different widths

Spring loaded aluminium body clamps the CPU securely in place

Code	Description
58R011	Enclose CPU Support Silver

Spin

Spin is a strong and versatile CPU holder that is capable of supporting a range of CPU sizes. Offering many of the benefits of other CPU supports Spin is also available as a lockable option to protect the CPU from theft in public and easy accessible areas.

Features

- Adjusts to support a range of CPU sizes
- CPU dimensions range:
- 370mm - 570mm (H) x 50mm - 280mm (W)
- Supports CPU weights up to 15kg - subject to desk material
- Available in silver
- Simple to install
- Comes complete with a slide and rotate mechanism

Slideable with 360º rotation

The clamp can be adjusted to fit a variety of widths

Power Modules

On Desk | In Desk | Under Desk
Electrical Safety

BS 6396 Electrical Systems in Office Furniture and Educational Furniture

Electrical equipment and installations must be designed and tested to ensure their safety and to comply with statutory regulations, in particular the "Electricity at Work Regulations". Relevant British Standards may be used as a means of demonstrating safety and compliance with the regulations. In the case of electrical systems in office furniture and educational furniture, the relevant standard for systems connected to the mains supply by means of a 13A plug is BS 6396.

Sockets installed in office furniture are intended to supply office equipment with a rating not exceeding 5A with BS 6396 referring to all office furniture electrical installations when completed must be tested. Section 7 of BS 6396 sets out the procedures. These tests should also be carried out on reconfigured desks and screens as well as new installations. Periodic inspections and tests must be carried out to fulfil the requirements of BS 6396 and the "Electricity at Work Regulations" in maintaining a safe working environment.

The diagrams below indicate the maximum number of socket outlets that may be connected from a single power supply cable fed from a 13 Amp BS 1363 plug and their relevant fuse ratings.

BS 6396 was updated December 2015 to now incorporate RCD protection and reflect the changes which have been in place for fixed wiring installations complying to the 17th Ed IEE Wiring Regulations BS 7671, the amendment to BS 6396 now requires new Desk Electrics installations to incorporate RCD protection if the fixed wiring does not.

BS 5733
General requirements for electrical accessories

BS 5733 specifies requirements and tests to check the safety in normal use of electrical accessories which are not covered by other specific British Standards. Such accessories are intended for use in household, commercial and light industrial premises where:

• The nominal supply voltage does not exceed 250 V a.c. single-phase, 50 Hz to 60 Hz or 250 V d.c
• The rated current of the accessory does not exceed 63A

Unless otherwise stated by the manufacturer, accessories conforming to this standard are intended for connection by cables or flexible cords conforming to BS 6004. BS EN 50525 or BS 7211. BS EN 61535.

BS EN 61535
Installation couplers intended for permanent connection in fixed installations

This standard applies to two, three, four and five wire installation couplers including earth, (if provided), with a rated voltage up to and including 500V a.c. and a rated connecting capacity up to and including 10mm for permanent connection in indoor electrical installations. Installation couplers with additional contacts for voltages other than mains voltages are outside the scope of this standard.

All Products within our range which are intended for connection to the fixed wiring of the building, (such as our Betatrak® Underfloor Busbar System and Modular Lighting Systems), use components certified to BS EN 61535.

Confidence in CMD Products

At CMD our highly trained and experienced engineers are fully qualified in all aspects of compliance with BS 6396 and all of our products are manufactured to BS 5733 and where relevant to BS EN 61535 and BS 7671 to assist in supplying products to enable full compliance with the relevant electrical installation standards.

power modules

USB Sockets

CMD supply three different types of USB sockets; USB Type A data, USB Type A power and USB Type A and C power. Our USB data sockets require a separate USB cable, which must be connected to the back of the module and to the corresponding USB socket on a computer to allow data to be transferred to and from the module. Our USB power sockets are hardwired into the module's power supply to produce a dual port USB power supply capable of charging a wide range of devices. Please speak to our sales team for more information.

cmd

Design a power module to suit your needs

power modules

Switches:
- Neon Switch
- Single Pole (with or without neon)
- Double Pole (with or without neon)

International Sockets:
- French/Belgian
- German
- Italian
- Swiss
- American*
- Indian

Note: International sockets are only available in black and white but can be fitted with a black, grey or white 50mm x 50mm surround.

UK Sockets:
- Standard UK 45 and 90 degrees (Unfused)
- Standard UK fused 45 and 90 degrees (3.15A and 5A)
- T-earth 90 degrees
- T-earth 90 degrees fused (3.15A and 5A)

*We recommend that a dual supply is used when a 110V American socket is installed with a UK 240V supply.

cmd

USB Chargers:
- 5 Amp Type A USB Charger with Smart IC
- 18W Type A and C Adaptive Fast Charger

All socket types are available in black, grey and white as standard.

Note: Slight colour variations may occur depending on socket type and batch number.

modules **power**

Data Sockets:
- RJ11
- RJ45 (Cat6 and Cat6a)
- LJ6C
- USB

Audio and Visual
- HDMI
- VGA
- 3.5mm Audio
- Phono
- S Video

While standard configurations are offered, power modules can be adapted to meet your individual requirements. Please give us a call and speak to one of our sales team to discuss your requirements.

On Desk Power

Capsule has a modern, curved appearance and has many new features including a dual port Type A and C adaptive fast charger with LED indicators, 2x UK sockets with individual switches and resettable 3A thermal fuses and includes fixing clamps. Capsule also has 2 data blanks which can house a range of data keystones.

power modules

Adaptive Fast Charger Features

- Capsule offers PD and QC2 adaptive charging which is fast charging
- It works on the USBC connection by having:
    1. 5 Volts x 3.0 Amps
    2. 9 Volts x 2 Amps
    3. 12 Volts x 1.5 Amps option
    4. 5 volt x 2 Amp (= 10 watt) option on the USB A connection

On Desk Power

Linear has an angular appearance and shares many of the same design features as Harmony and Contour. These include a lateral fuse carrier, internal segregation between power and data and a double end cap system that has been designed to hide the fixing screws. Linear is fully compliant to current safety regulations.

Linear
Power Module

Now with Type A&C Charger

Double end cap design

Angular design

Top fixing C clamp

73.30mm

69.45mm
Features

- Power and data cables all exit from the back of the unit
- Unit complies with BS 5733
- All standard options are supplied with a 1m mains lead to 3 pole connector
- Requires a separate mains lead if connected directly to a wall or floor socket
- Fixing via Linear top fixing and under desk C clamps or adhesive fixing kit
- All UK sockets feature integral fuses. Choice of 3.15A or 5A fuses are available to comply with BS 6396

Build it your way

Please see page 31 for more information.

Manage your energy

Configure to allow energy to be monitored and controlled with Footprint. See page 73 for more details.
*Please note that 6 tiles is the maximum with a maximum length of 362.5mm.

Cables: White and grey modules are supplied with white cables and black modules are supplied with black cables.

Data Cables: CMD cannot accept any responsibility or liability for providing category 6 performance in products supplied. CMD cannot accept any responsibility or liability for providing HDMI performance in products supplied over 5m in length.

Fuses: Only accessible after removal of equipment plug. Lead lengths shown will be the conductor length and not the distance from the end of the module to the plug. For example, a 3m prewired power lead will be approximately 2.875m as 125mm will be internal for the termination. This is also applicable for data leads. Data fascias may be subject to colour change.

Features

- Choice of Black, Grey or White body and matching socket fascias
- Inca has 4 usable faces offering a wide range of configurations for power and USB charging
- Unit complies with BS 5733
- All standard options are supplied with a 1m mains lead to 3 pole connector
- Requires a separate mains lead if connected directly to a wall or floor socket
- Inca is available as a freestanding on desk module or can be fixed using a simple grommet hole fixing
- All UK sockets feature integral fuses with a choice of 3.15A or 5A fuses to comply with BS 6396
Manage your energy

Connect to Footprint to allow energy to be monitored and controlled with Footprint. See page 73 for more details.

Cables: White and grey modules are supplied with white cables and black modules are supplied with black cables.

Fuses: Only accessible after removal of equipment plug. Lead lengths shown will be the conductor length and not the distance from the end of the module to the plug. For example, a 3m prewired power lead will be approximately 2.875m as 125mm will be internal for the termination.

power modules

In Desk Power

With its innovative design, PortHole is ideal for adapting an existing 80mm cable hole to allow a single power socket and a choice of keystones to be fitted to a desk with a simple screw fit mechanism.

PortHole
Power, Data and USB Charging Module

Choice of USB, HDMI, Data, Mini Jack or USB Charging

**Independently certified to comply with BS 5733**

Individual fused power socket (3.15A or 5A options)

Available in black, white or grey

Available with matching surround to deflect spillages

Ø95mm

7mm

60mm

Ø103.5mm

Features

- Available with a choice of black, white and grey plastic fascia with matching surrounded
- Unit complies with BS 5733
- All standard options are supplied with a 1m mains lead to 3 pole connector (3m data lead and 2m USB lead where appropriate)
- Requires a separate mains lead if connected directly to a wall or floor socket
- Easy to retrofit, incorporates an under desk, hand tightened barrel nut to fix unit in place
- USB charging option complies with the latest charging standard (BS EN 62684 Interoperability specifications of common external power supply (EPS) for use with data-enabled mobile telephones)
- Designed to fit any desk thickness between 12mm and 50mm

Manage your energy

Connect to Footprint to allow energy to be monitored and controlled with Footprint. See page 73 for more details.

Cables: White and grey modules are supplied with white cables and black modules are supplied with black cables.

Data Cables: CMD cannot accept any responsibility or liability for providing category 6 performance in products supplied. CMD cannot accept any responsibility or liability for providing HDMI performance in products supplied over 5m in length.

Fuses: Only accessible after removal of equipment plug. Lead lengths shown will be the conductor length and not the distance from the end of the module to the plug. For example, a 3m prewired power lead will be approximately 2.875m as 125mm will be internal for the termination. This is also applicable for data leads. Data fascias may be subject to colour change.

power modules

Furniture Power

Face is a new module designed to fit the vertical surface of any furniture. It features a seamless surround that is available in black, grey or white but can also be finished in stainless steel (Please call for details). The socket faces have been specifically designed to fit flush to the furniture surface to respect the overall appearance and design of the furniture and to help prevent snagging. Available portrait (type 1) and landscape (type 2) and offering power and USB charging.

Face
Power Module
Surround available in black, grey or white

Type A and C USB charging socket

Choice of fused UK or international sockets

Features

- Seamless low profile surround available in black, grey and white painted finish
- Available in one size; 192.5mm x 88mm (cut out size 163mm x 69mm). A scaled cut out template is available on request
- Available as a portrait or landscape module
- Flush power sockets to avoid snagging
- Fitted from front and locked into position using under desk fixings
- All UK sockets feature integral fuses. Choice of 3.15A or 5A fuses are available to comply with BS 6396
- Unit complies with BS 5733
- All standard options are supplied with a 1m mains lead to 3 pole connector
- Designed to fit vertical surfaces between 18mm and 37mm

power
modules

Face is available in two orientations; Portrait and Landscape. Whilst the specification of both modules is the same the orientation of the sockets and graphics is different so please ensure you specify which type you need.

Portrait

Landscape

Fuses: Only accessible after removal of equipment plug. Lead lengths shown will be the conductor length and not the distance from the end of the module to the plug. For example, a 3m prewired power lead will be approximately 2.875m as 125mm will be internal for the termination, this is also applicable for data leads.

Cables: White and grey modules are supplied with white cables and black modules are supplied with black cables.

Data fascias may be subject to colour change.

Under Desk Power

Elite⁺ and Eliteⁱ Power Module

90° rotated socket for transformer plugs

UK sockets have a choice of 3.15A or 5A lateral fuses to comply with BS 6396

Available with neon switch

Now available with Schuko sockets

Elite⁺ is a moulded plastic power module, great when affordability is top priority.

- Requires a separate mains lead
- Product independently tested to BS5733
- 6 gang option only available with 3.15A fuse

UK Code	Schuko Code	Description

cmd

Conti is a completely configurable desk power system, designed specifically to meet the increasing power and communication needs of the modern office. Modules have been designed with speed of installation and flexibility in mind. Its many unique design features enable a vast choice of power and data options to fulfil most specifications. A choice of either metal or plastic extrusion is available.

Conti Power Module

power modules

In-feeds
- Tap Offs
- Hard Wired to mains cable (3 and 4 pole) in 1.5mm², 2.5mm² and 4.0mm²
- SY cable 1.5mm² and 2.5mm²
- 16mm and 20mm Flexible conduit (i.e. tap off)
- Connector block 16A and 32A (for self wiring)
- 3 Pole Connector Panel mount (3 and 4 pole)
- Neutrik Panel mount (20A and 32A)
- GST connectors

Protection
- Std mains fuse (10A and 13A)
- MCB (various std ratings) - Grey, White and Black shrouds available
- RCD/RCBO (various std ratings)
- Surge Filter
- Mains conditioning filter
- RFI filter

Out-feeds
- 3 and 4 Pole Connector

Data
- RJ11
- RJ45 (Cat6 and Cat6a)
- LJ6C (telecom)

Construction
- Plastic (89 Series)
- Metal (86 Series)

Other
- USB
- 3.5mm Audio

rotasoc®

Rotasoc® is widely considered to be the industry standard for customisable under desk power as it includes a comprehensive selection of multi-socket power and data modules with 360° rotatable socket outlets, available in 32 and 16 Amp versions.

Features

- 32A internal copper busbar
- 360° rotatable sockets
- Easy fit modular system
- Integrated power and data
- Quality manufacture and testing (Kite Mark and BSI Certified to BS 5733)
- Standard, low noise / clean earth and dual circuit options
- 32A system conforms to BS 7671 Amd 3 section 543.7 for high protective conductor currents
- Can be used to comply with BS 6396
- Termination to other tap offs are available on request

power modules

Flexible interconnecting module

A selection of interchangeable modules to meet the changing needs of your business

Pre-wired infeed

Unique rotating power sockets

A choice of switching protection modules

Betatrak tap off

Clean Earth and fused options available

cmd

**Build your own
Rotasoc® system in 5 easy steps...**
Step 1
Infeed - Available in 32A and 16A options

Step 2
Protection/Switching - A variety of modules are available
Step 3
Sockets - Modules are available with 2, 3 or 4 sockets, fused and unfused

Step 4
Flexible Interconnect - 32A and 16A modules are available in standard lengths
Step 5
Data/End Cap - Choose data or an end cap to complete your system

rotasoc®

To connect the Rotasoc modules

1. Check that both male and female ends have the same colour coded busbar shields
2. Turn modules over and lift the grey cam-lock lever with a small screwdriver into the upright position
3. Locate the male and female ends and push together until fully closed
4. Press the grey cam-lock lever over until flush with the casing to lock the modules together

Connection to be made by a competent person only.

To fix modules to a surface

1. Flip up all rubber screw caps with a flat blade screwdriver
2. Insert through all holes a No 8 pozi-pan screw or M4 bolt to the required length
3. Tighten the screw/bolt down to the mounting surface
4. Replace the rubber screw caps

Rubber screw caps

360º rotating sockets can be positioned as required

Energy Management
Power Modules | Gateway | The Dashboard

cmd

Footprint

The footprint system helps identify ways of reducing power and saving money

energy management

Analysis

Footprint records energy usage and presents the information on the dashboard. You can view graphs, make comparisons, and create pdf or csv reports.

Costing

Enter your own rates and Footprint will calculate the running or energy costs for all the equipment being monitored.

energy
management

Monitors

CPU Supports

Power Modules

Control

Different levels of control are available via the dashboard from full automation to manual overrides.

Modules

Modules are built with intelligent smart meter technology, with each module recording the energy usage of any devices plugged in.

Dashboard

The dashboard can be accessed via any standard internet browser, so no requirement for any additional software.

Energy Management

The **smart meter** is responsible for recording the energy usage of connected appliances.

The **auxiliary sockets** can be controlled via the dashboard and switched ON/OFF either manually or automatically.

The **master socket** remains ON at all times and it is recommended this socket is used for the PC.

energy management
The **gateway** is the link between the power modules and the dashboard. Transmitting data and sending instructions. Note: Gateway MAC addresses and PIN numbers, in relation to their location, need to be logged.
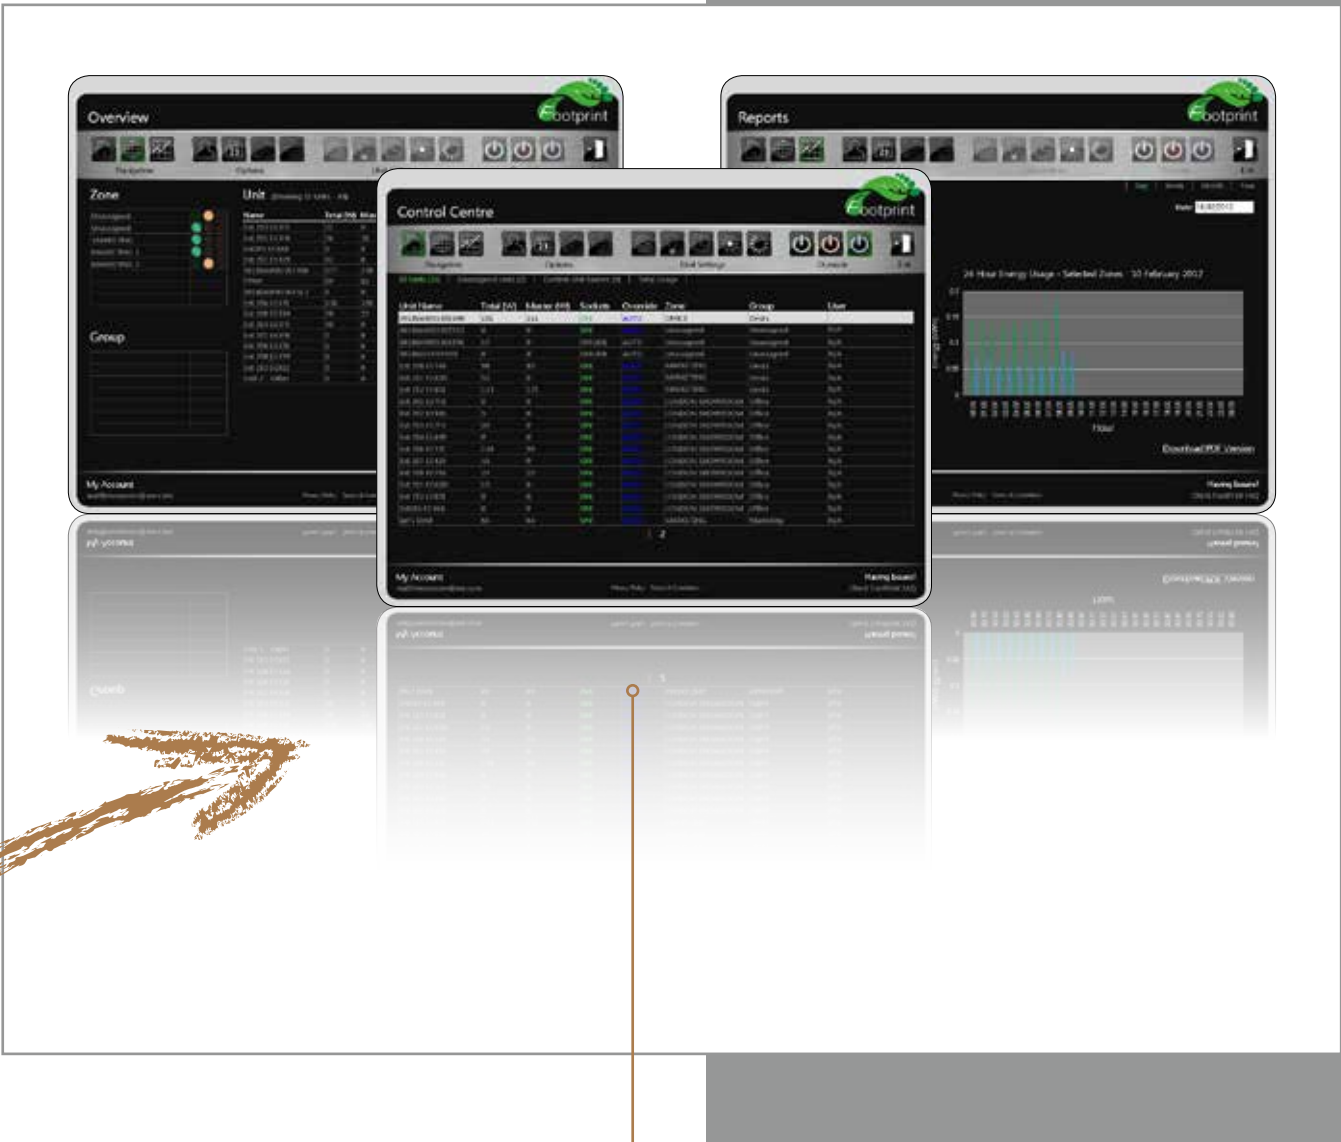

Data is sent via the gateway and is displayed in a user friendly format on **the dashboard.** This allows users to schedule, set thresholds, and control all connected modules.

Build it your way

Please see page 31 for more information.

Note: Footprint is sold with a 12 month inclusive licence which includes access to, and exporting of, data together with technical support during office hours. A renewal licence fee will be applicable after the 12 month inclusive period expires. https://dashboard.cmdfootprint.co.uk.

Energy Management

Footprint is a system that gives the user total control. Connecting appliances to the Footprint power module will allow users to collate energy usage data, monitor activity levels and schedule power.

1 **The master socket with built in smart meter technology**

The master socket is an uncontrolled outlet. The additional data obtained from this socket can be used to control the auxiliary sockets depending upon the operational mode set. The in-built smart meter measures and transmits highly accurate consumption data which can then be reported on.

2 **The gateway**

The Gateway is the hub of the system. The gateway sends messages from devices, equipment or web browsers using SSL certificates to encrypt the information that is passed. The SSL certificate provides encryption between the web browser or device and the host server platform and implements 128 bit AES/TLS encryption for all traffic. The gateways need to be positioned a minimum of 2m from a Wi-fi access point.

3 **The power module**

The power module allows users to connect appliances in order to make them smart as well as controllable. Using the recognised low power wireless technology of Zigbee®, the power module communicates to the Gateway allowing for energy monitoring and device control. Zigbee® has been designed for wireless mesh networking enabling hundreds of devices to transmit information to one another in real time. Due to its versatile nature, the mesh network also means that if one device stops transmitting, the system will continue to operate. The power modules are pre-configured to connect to the Gateway with minimal consumer set-up.

4 **The dashboard**

The control centre of operations, the Dashboard will allow different types of users to monitor activities and get involved. The Dashboard will collect energy usage and display it as usable data in the form of expenditure, CO_2, and KWh used. Not only a monitoring tool, the Dashboard allows you to control the entire system.

Audit

You now have the tools to show users their energy consumption on an individual, department or floor basis. This makes it easier for users to take responsibility and ownership of their own actions fuelling behavioural changes to take place.

Target

When taking accurate readings it is easier for companies to benchmark a starting point and then look to introduce appropriate targets to measure the progress being made.

Monitor

If you want to improve it you first have to monitor it. By seeing exactly how much electricity is being consumed, it is easier to introduce changes to make savings.

Manage

With informed and evidence based data being available you can improve your energy use.

External Process

CMD Process

Client outlines their requirements and provides drawings of office plans to CMD

Consultant and CMD have initial briefing meeting and discuss connection options

Power Distribution

Betatrak Busbars | Floor Boxes | Cable Hives

Underfloor Busbar

Betatrak® Underfloor Busbar

Busbars offer an efficient, flexible solution to underfloor power distribution as they use a click fit method for that fast and simple install. To reduce up front labour costs all busbars are tested at our manufacturing facilities meaning no onsite commissioning. Underfloor power solutions are also very low maintenance and exceptionally reliable making it the perfect solution in today's modern construction world.

The benefits of using an Underfloor Power Distribution System

- Choice: a comprehensive range of supply systems
- Flexibility: can be used in new or existing layouts
- Versatility: all kinds of configurations are possible including bends/corners
- Safety: colour coded tap offs for easy recognition. Sliding dust covers to protect outlets
- Height clearance: low profile busbar suitable for shallow floor voids
- Convenience: variety of Betatrak® lengths with different socket centres. 300mm standard (150mm and 600mm available on request)
Low profile busbar

Colour coded for easy recognition

Various tap off lengths available

32 Amp tap offs incorporate an unfused plug (fused available)

16mmø metal flexible conduit as standard (Black LSOH polyamide conduit available)

Slide and lock with positive latching (prevents accidental disconnection)

Due to transport restrictions 3.6m length busbars have a minimum order requirement of 10 lengths. Orders of less than 10 units will be supplied as 2x 1.8m lengths per 3.6m length ordered.

The 63 Amp Betatrak® System caters for single phase standard, clean earth (CE) low noise, auxiliary, three phase or dual applications. Betatrak® comes in lengths of 1.2m, 1.8m, 2.4m or 3.6m with tap off positions provided at 300mm as standard (Note: 150mm and 600mm available on request). As a result, the system is extremely versatile and suitable for high to low density tap off requirements.

All integral connectors and tap off plug sockets are colour coded to avoid any possible errors during assembly. For maximum safety each operates a shutter on insertion to ensure no accidental contact can be made.

Installation
Betatrak® used within raised access floors is normally arranged in parallel runs with the feed units to the Betatrak® orientated towards the incoming supply. This offers an economic format inherent in long straight runs. Spacing should be a maximum of 5 metres between each length of track and 2.5 metres from the perimeter when using a standard 3 metre tap off to a floor box.

Attention should be given to the total power requirements to avoid exceeding the maximum power rating of the Busbar.

The following versions are available for both Busbar and Tap Offs:

- Standard Earth
- Clean Earth (CE) Low Noise Earth
- Auxiliary Earth
- Dual Circuit
- Three Phase

Due to transport restrictions 3.6m length busbars have a minimum order requirement of 10 lengths. Orders of less than 10 units will be supplied as 2x 1.8m lengths per 3.6m length ordered.

distribution **power**

Underfloor Busbar

How to install the Busbar

Starting with the feed unit, remove the dust cover over the colour coded socket and simply snap the integral coupler, pre-installed on the busbar, into the feed socket. The next length of track is then fitted to the socket end of the first length of busbar as previously described, this is then repeated for the following lengths until the run is complete. On the final length of busbar section the dust cover supplied is fitted on the final unused coupling point to protect against the ingress of foreign contaminants. The feed unit is then secured via the slots in the base and the busbar every 1200mm (max) by using the mounting brackets provided.

CMD is registered by BSI to BS EN ISO 9001 and BS EN ISO 14001. Betatrak® is designed to comply with regulation 434.2 of BS 7671: 2008 Amd 3 (IEE Wiring Regulations) and 543.7 earthing requirements for the installation of equipment having high protective conductor currents.

The scope of Reg. 543.7.1.3 requires that every final circuit is intended to supply one or more items of equipment, where the total protective conductor current is likely to exceed 10mA. in normal use, shall have a high protective connection.
Typical Floor Layouts
Busbar
3m tap offs provide full coverage when busbar is laid out on 5m centres.
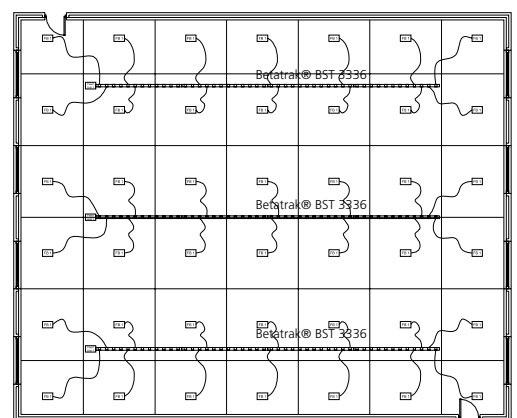

Floor Boxes
Typical layout: 1 floor box for every 10m².

Due to transport restrictions 3.6m length busbars have a minimum order requirement of 10 lengths. Orders of less than 10 units will be supplied as 2x 1.8m lengths per 3.6m length ordered.

Tap Offs

Tap offs are colour coded and non-interchangeable between busbar types. The slide locking, positive latching tap off plug prevents accidental disconnection and can be added to or removed from the busbar while the system is live. All 3 metre, 32 Amp tap offs incorporate an unfused plug, and as standard, 16mmØ metal flexible conduit enclosing 3 metres of 4mm^2 cables. These units are designed to comply with Regulation 434.2.1 of BS 7671:2008 Amd 3. 5 metre unfused tap offs are also available for use with individual track runs that are rated at no more than 32Amp, where the protection of the tap off against both overload and fault current is provided by the track protective device.

CMD tap off units conform to the high integrity protective requirement by virtue of using a protective conductor of 4mm enclosed within a flexible conduit, thus providing additional protection against mechanical damage.

Colour coded

Slide locking
The benefits of using a CMD Tap off

1. Choice: a comprehensive range of supply versions
2. Flexibility: can be used in new or existing layouts
3. Safety: all units are designed to comply with regulation 434.2.1 of BS 7671: 2008 Amd 3
4. Convenience: all tap offs are colour coded and non-interchangeable with slide locking and positive latching to prevent accidental disconnection

**These tap offs are 3 Phase (L1, L2, L3, N, E) rated at 28 Amp

cmd

32 Amp 3 metre tap off

32 Amp 3 metre tap off unit is comprised of an unfused plug with 16mmØ flexible metal conduit with integral 3m x 4mm^2 cables.

These units are designed to comply with regulations 434.2.1(i) BS 7671:2008 Amd 3 by virtue of the following:
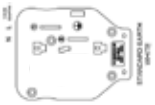

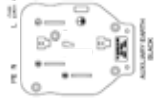

1. Maximum length of cable is <3 metres
2. Minimum risk of faults as the item is factory assembled and fully tested
3. Fully protected by flexible steel conduit located within raised access floor that offers further protection

5 metre tap off unit

Tap off units in excess of 3 metres should only be used if they contain a fuse or the busbar is protected by a 32Amp rated protective device.

All tap off units comply with 17th Edition Wiring Regulations Section 543.7 (High Integrity Earthing).

Numerous configurations of tap off units including fuse options are available on request. Longer lengths available on request. CMD tap off units conform to the high integrity protective requirement by virtue of using a protective conductor of 4mm enclosed within a flexible conduit, thus providing additional protection against mechanical damage.

DATE(S) OF TESTS:	26th February - 23rd August 2016

The apparatus, constructed in accordance with the description, drawings and photographs incorporated in this certificate has been subjected to the series of proving tests in accordance with:

IEC 61534-22 Edition 2.0, 2014-06 and BS EN 61534-22: 2014

Verifications with reference to the tests listed in Sub-Clause 5.3 of IEC 61534-1: Edition 2.1 2014-06.

1.	Marking and Documentation, Clause 8	8.	Insulation resistance test and dielectric strength test, Clause 15
2.	Construction, Clause 9	9.	Normal operation, Clause 16
3.	Clearances, creepage distances and solid insulation, Clause 10	10.	Temperature rise, Clause 17
4.	Protection against electric shock, Clause 11	11.	Short-circuit protection and short-circuit withstand strength, Clause 18
5.	Terminals and Terminations, Clause 12	12.	Resistance to heat, Clause 19
6.	Screws, current carrying parts and connections, Clause 13	13.	Fire hazard, Clause 20
7.	Mechanical strength, Clause 14	14.	External influences, Clause 21

This certificate applies only to the apparatus tested. Responsibility for conformity of any apparatus having the same or other designations rests with CMD.

Issued by Intertek, Centre Court, Meridian Business Park, Leicester, LE19 1WD.

cmd

One piece 'fast fit' (20 series) - One piece back box.

Individual 'fast fit' (20A series) - Individual box bases for each compartment.

Screed/Screw fixed/Stainless (99 series) - Screed and stainless steel boxes available. Stainless suited for more prestigious spaces e.g. reception areas.

Fully configurable floor box
• Wide range of accessory plates
• Can be prewired with Betatrak® tap offs
• Deeper versions available

Fast fit advantages
• Quick removal with services fitted
• Installation tolerance of -0/+3mm
• Fixes to floor thicknesses of 15-50mm
Carpet inlay
• 6.5mm

Blue/grey moulded polycarbonate ABS
• RAL 7031

Handle
• Self Closing

Robust cable outlet
• Designed with 'Anti-Trip' facility

Optional lockable lid

Added security allows access by competent personnel

Floor Boxes

Integral RCD/RCBO

Our individual 20A Series 'Fast Fit' access floor box with integral Din Rail mounted RCD or RCBO protection has been designed to meet the demands of the modern day working environment. By using a modular breaker wired to normal sockets the need for expensive RCD sockets is removed. Separate removable compartments allow services to be removed whilst the floor box body and lid remain in situ.

IP Rating IP2X

- Integral RCD/RCBO wired to normal sockets
- Fast and simple tool free fixing mechanism
- Easy access for carpet fitting: the lid and trim is removed in seconds
- Quick release lid for easy access to accessory plates
- Can be pre-fitted with socket outlet and tap off unit
- Self closing lid
- Non-trip cable outlet brackets
Overall Depth	Plug Space	Socket Space
95mm	30mm	45mm
Note:
- These boxes are 4 compartment but use the 1st compartment to house the RCD/RCBO
- Removable compartments are double width for 1 twin socket and triple width for 2 twin sockets
- Compartment sizes are 75mm x 175mm

Floor Boxes

Screed + Screwfix

The 93 and 99 Series range of floor boxes are available for use as either a 'stand alone' screed floor type or a screw fixed type suitable for raised floors. Screed floor types are supplied with jacking legs which allow 10mm adjustment for levelling with the finished floor depth and are sealed to prevent ingress of screed.

Features:

• Quick release lid for easy access to accessory plate
• Self closing lid
• Non-Trip cable outlet brackets

Floor Boxes

Stainless Steel

3 or 4 compartment stainless steel access floor boxes comprise of three distinct assemblies: the box base, the mounting frame and purpose made stainless steel frame/lid assembly. The box base has 20mm and 25mm conduit knockouts in each long side and dividing fillets that are provided to separate services. The box base is manufactured from galvanised steel and comes complete with a grid to accept interchangeable accessories.

The mounting frame is manufactured from galvanised steel and has two fixing holes in each long side. The frame/lid tray assembly is manufactured from brushed stainless steel with straight edges and cable outlet brackets in the same material. The recess in the tray lid is 23mm deep. Maximum outside size of S/S trim is 325mm x 193mm and overall box depth is 99mm. The box is provided with jacking legs for levelling and adjustment – Screed option only.

Cable Hives®

Cable hives are an alternative to floor boxes and slab boxes for taking underfloor power to under desk level. They offer an ideal solution for a fast, simple and unobtrusive installation. Easy to install and relocate if necessary, cable hives are ideal for use with our Conti power module, perfect for any office power requirements.
Split lid option - Integral foam insert for secure cable grip

Accessible lid with retention cable

Hive colour - Polycarbonate ABS Grey - RAL 7031, (other colours available, minimum quantity requirements)

Lid Variations: Accepts up to 2 x 40mm flexible conduits

Interlocking clamp top

Simple access: 'Push fit' for fast installation Unique self latching mechanism

Available in 2 sizes with 127mm and 210mm cutout diameters

- Installed in less than 5 seconds – removed in less than 10 seconds (No tools required for fitting)
- Available in127mm and 210mm (Outside diameter: 140mm and 230mm respectively)
- Quality, reliability and safety come as standard
- Self closing lifting handles

- Manufactured from polycarbonate – ABS in standard grey (RAL 7031)
- Fasteners will work on panel thickness of 5mm and upwards
- Panel cut out diameter: 127mm and 210mm

Maximum number of conduits accepted when lid is in place:

Standard Cable Hive (127mm)
PPHC261G (Soft Foam)
8 x 16mm
3 x 20mm
3 x 25mm
2 x 32mm

Large Cable Hive (210mm)

Standard (127mm)

Cable Grommet
Accommodates all cable types

Can accommodate all cable types or 3 metal conduits up to a 25mm diameter or 4 x 20mm diameter

PC/ABS (Grey as standard)

Manufactured from hard wearing durable flame retardant PC/ABS in Grey as standard (alternative colours available as special order)

Push down - fast fixing

The grommet can simply be secured by pushing down into position

Features:

- 'Fast-Fit' installation from floor tile fixing to cable deployment
- Allows simple access for services underfloor to workstations of all kinds
- UL 94 VO Flame class rating
- Integral carpet gripper spikes
- Floor service unit conforms to IEC-61534-22

power distribution

Black Box™ Distribution

A Female Neutrik plug is required to supply power. Please ask for part code PXO2132GR for use with Clean Earth underfloor busbars and tap offs and part code 440713 for use with Standard, Auxiliary Earth and Three Phase underfloor busbars and tap offs.

Features:

- Compact aesthetic modular Power Distribution Unit (PDU) for the distribution of power within office furniture installations
- Requires a separate connecting mains supply
- Incoming circuit protection device options by either a 32A RCD (overload protection up stream) or 32A RCBO
- Up to 8 outgoing circuits, individually protected by 6, 10 or 16 amp MCBs, available in 4, 6 or 8 module variations
- Outgoing circuit connected from the PDU by Wieland GST18 connectors in either 3 pole (Standard Earth) or 4 pole (Clean Earth)
- All MCBs are accessible through a clear hinged cover which has the option of being lockable or accessible by the use of a tool only
- Stylish design, ideal for commercial offices, health care and education projects where the PDU may be sited in publicly accessible areas
- Products are CE Marked conforming to the requirements of BS 5733

AUDACY®
WIRELESS CONTROLS

ANTICIPATING THE FUTURE

The Audacy® Wireless Controls system focuses on efficiency in all its forms. Faster and easier to install, you save time and costs associated with build-out and renovation. Our streamlined wireless system allows you to better control your powered environment while advanced smart components minimise energy and lighting costs over time.

CONTROL EVERYTHING. SWEAT NOTHING.
The Audacy Interface is the brains of your operation. Uncomplicated and easy to program or adjust over time, it allows you to schedule power to your lighting systems or to affect change in real time.

Leading the competition, the Audacy Wireless Controls system brings together technologies that anticipate your future.

GET AHEAD OF YOUR GOALS.
In short, the Audacy Wireless Controls system delivers eco-friendly technologies that save you money - on the road to fulfilling the biggest priorities of your business and every business.
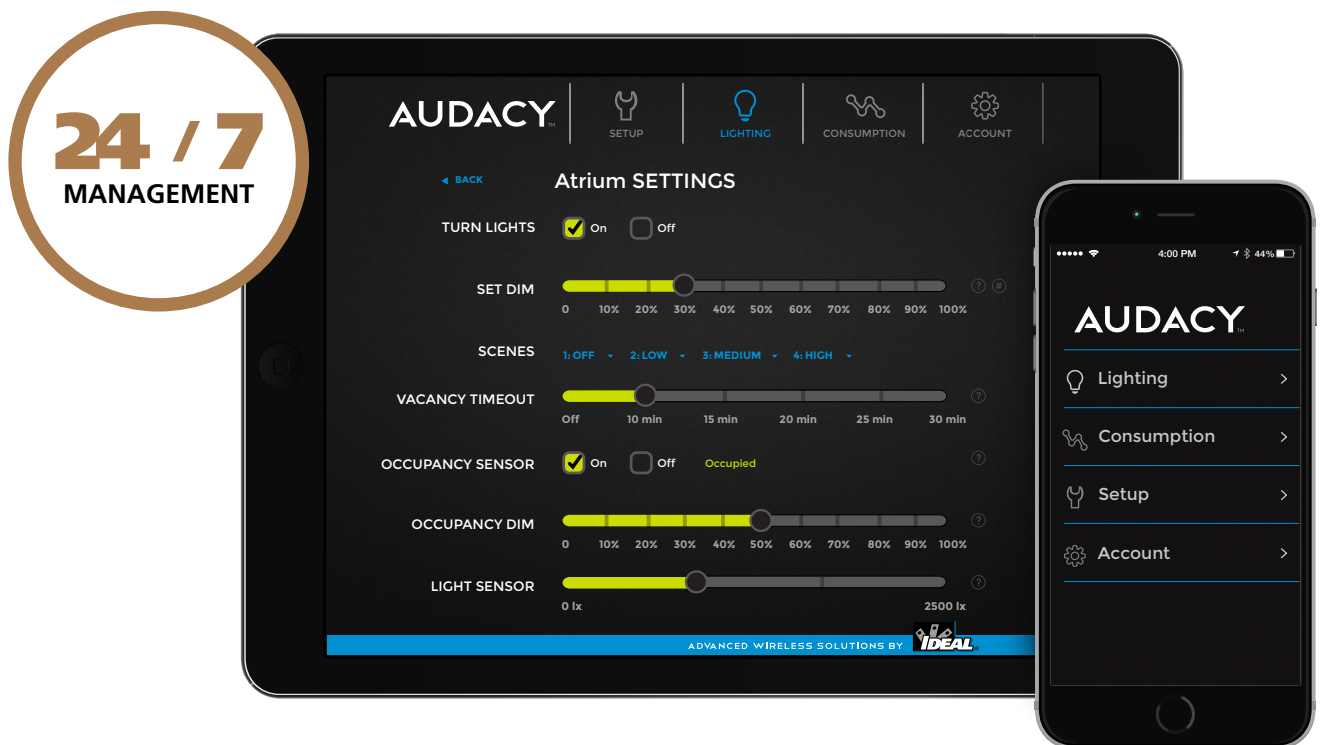

24 / 7 MANAGEMENT

MORE MANAGED. LESS MANAGEMENT.

The online Audacy Interface is where it all begins and ends. Customisable and proprietary to your operation, it is easy to configure and adjust and is accessible using the browser based online portal or a free downloadable Apple® or Android App.

Intuitively organised around a framework of basic categories and simple inputs, the Audacy Interface enables management of every component installed as part of your overall system. Together, these components ensure 24/7 custom control of your environment.

Upload all your devices to the Audacy Interface via the mobile app during installation, and instantly begin creating schedules and establishing settings for your system. The Audacy Interface enables you to set preferences and achieve the desired lighting throughout your facility.

lighting control

SIMPLIFY YOUR LIGHTING

The new Audacy Wireless Controls system by CMD Ltd gives you more control over your lighting environment while saving up to 50% on your corporate lighting costs. Crafted at the intersection of simple and innovative, the Audacy system reimagines wireless lighting control and represents the streamlined future state of lighting technology for commercial, industrial, education, retail, healthcare, entertainment and other uses.

The Audacy system's online Interface is the brains of your operation. Uncomplicated and easy to set-up, our intuitive Interface allows you to configure and schedule lighting in your space. You define the rooms that need control depending on the time of day. You control all of your system's hardware.

Allowing compliance with 'BS EN15193 Energy performance of buildings - requirement for lighting' and 'Building Regulations: Approved documents L2A and L2B (England and Wales)' and ESOS (Energy Saving Opportunity Scheme) our lighting system answers the call for more fiscal and ecological responsibility. The Audacy system's proprietary electronics are engineered to provide up to 25 years of maintenance-free life. Every Audacy component is designed for easier system modification over time, ensuring next-generation utility.

CONFIGURE YOUR SYSTEM

Harvest
as much daylight as possible by setting minimum or required light levels.

Maximise
your employees' comings and goings by minimising energy use in empty rooms.

Schedule
lights on or off based on your designated work hours.

The system can also be used to dim or brighten any room or room group remotely at any time.

USER CONTROLLED

Let your employees manage their own light levels by assigning specific levels of user control to individual employees. Or, use any Audacy Switch to override any light setting while using a specific room.

MANAGED REPORTS

Your online Audacy Interface provides an immediate and more robust understanding of your lighting costs and allows you to forecast more effectively.

FIND OUT MORE

Compared to other competitive wired solutions, installation for an Audacy Wireless Controls system can take up to 85% less time.

lighting control

PRODUCT LINE-UP

The entire Audacy® Wireless Controls system is sleek – with every component boasting unparalleled function and flexibility.

Audacy offers a comprehensive and customisable lineup of easily-installed wireless lighting components - for greater efficiency and control of your entire wireless lighting system.
Gateway

The primary control device; each Gateway coordinates fixtures and sensor components, in the manner that they were grouped together, and provides 24/7 communication with your Audacy Interface. Each Gateway is the "controller" for all of your program inputs.

Luminaire Controller

Easily installed modules that can turn on, turn off, or provide 0-10V dimming. Available as an attachment to the luminaire enclosure.

Switches

Remote, Wall-Mount switches have touch panel and can wirelessly dim or turn lights on and off.

Light Sensors

Reliably adjusts brightness to harvest maximum daylight without wiring.

Motion Sensors

Ceiling and Wall-Mount devices that require no wiring and sense occupancy and/or vacancy. Motion sensors communicate with each Gateway to "alert" occupancy status, ultimately signaling Luminaire controllers to turn off devices.

Lighting Control

SYSTEM SETUP - INSTALLED IN 4 EASY STEPS

1 Setup Infrastructure

Gateway

First, connect a Gateway to the Audacy Interface. Then, install Luminaire Controllers into existing fixtures. Add wireless switches and sensors. You are now ready to manage and control your lighting environment.

2 Connect Lights

Luminaire Controllers

Connecting lights and light groupings is fast and cost-effective with Audacy Luminaire Controllers – streamlined plug-and-play modules that quickly tie every fixture into your system. On average, a Luminaire Controller can be installed in less than 3 minutes.

3 Add Devices

Switches and Controllers

With electronics engineered for maintenance-free operation, switches and sensors are easy to install almost anywhere.

4 Configure and Control

User Interface

Schedule and set your light preferences with superior ease via the Audacy system's simple online Interface. With Audacy, you're at the helm of the most intuitive wireless controls system available.

Lighting Control

Gateway

59-GW1100-ETHUK

Each Gateway is the primary processing hub of the Audacy® Wireless Controls system, providing 24/7 back-and-forth communication between your Audacy Interface and on-site lighting environments.

How It Works
Hardwired and mounted to any wall, the Gateway wirelessly relays scheduled and real time lighting inputs – as established via your Audacy Interface – to any light fixture equipped with an Audacy Luminaire Controller.

As You Command
In this way, the Gateway communicates with up to 250 system-enabled fixtures to ensure selected lights turn on, turn off or dim where and when you desire.

Know More, Spend Less
Likewise, each Gateway device wirelessly receives and prioritises inputs from onsite sensors, switches and mobile interfaces. Information such as sensor data, fixture status, user overrides and energy usage is then relayed back to your Audacy Interface where it is available for your periodic review.

The Audacy Gateway allows you to easily understand, via the online Interface, evolving light usage patterns. From there, it's easy to adjust and maximise your system and your energy efficiency over time.
The 59-GW1100-ETHUK Wireless Gateway by CMD Ltd is an electronic communications device which acts as the central processing "hub" of the Audacy system. The 59-GW1100-ETHUK wirelessly receives and prioritises inputs from sensors, switches and/ or the Audacy Interface (e.g., website or app). It then communicates wirelessly with each Luminaire

Controller to turn on, turn off or dim light fixtures. The 59-GW1100-ETHUK can also pass information such as light fixture status, sensor data, and energy usage to the Audacy Interface.

Specification

Item	Description
Radio Frequency Range	915.9 - 917.3 MHz, Dual External Antennas
Wireless Protocol	Proprietary based on IEEE 802.15.4
Encryption	Proprietary based on AES encryption
Rated RF Power Output (W)	<12.5 dBm short duration, utilising both frequency hopping and direct sequence spread spectrum
Transmit Range	90m indoors to an Audacy Luminaire Controller in a typical commercial building; extended range when repeater mode enabled
Repeater Mode	Enabled via Audacy Interface or Gateway
Input Voltage	24V AC/DC, removable terminal block
Configuration/Network Port	Ethernet
Operating Temperature	10°C to 32°C
Storage Temperature	-20°C to 50°C
Installation Environment	Indoor use only
Mounting	2 mounting holes—vertical (wall-mount) or horizontal
Colour	Black
Dimensions	215.9mm x 134.6mm x 45.7mm, excluding antennas
Weight	459g
Warranty	5 year
LVD Compliance	BS EN 60950-1 / IEC 60950-1
EMC Compliance	BS EN 55015, BS EN 61547 & ETSI EN 301 489-3 V2.1.0 (ETSI EN 301 489-1 V2.1.1)
Radio Compliance	ETSI EN 300 220-2 v3.1.1* and ETSI EN 300 220-1 v3.1.1 / RED 2014 / 53 / EU

Code	Description
59-GW1100-ETHUK	Standalone (i.e., no BAS)

lighting control

Lighting Control

Luminaire Controller, External Mount

59-SCD1000-EMUK

This rugged, wireless module is a primary component of the Audacy® Wireless Controls system. These easily-installed devices can turn on, turn off, or provide 0-10V dimming.

How It Works
AC-powered Audacy Luminaire Controllers operate in the highly reliable 915 MHz spectrum. Each Luminaire Controller has conveniently wired terminations for quick and easy installation.

Because Time Is Money
Your electrical installer mounts this Luminaire Controller to a junction box or luminaire body through a knockout, and the wiring is done inside the box. A typical wired system is vastly more labour intensive and costly to install.

The Audacy Luminaire Controllers get your system up and operational faster and can be modified over time with incredible ease. Luminaire Controllers transmit 90 metres to the Gateway and with the repeater mode enabled, the range is extended even farther.
The 59-SCD1000-EMUK external-mounted Luminaire Controller by CMD Ltd is an AC-powered, wireless lighting control device that is part of the Audacy Wireless Controls system. Operating in the highly reliable 915 MHz spectrum, the 59-SCD1000-EMUK is a module that can turn on, turn off or provide a 0-10V dimming signal to an electronic dimming ballast or LED driver.

59-SCD1000-EMUK quickly and easily installs using a knock-out on a junction box or fixture and provides the ability to control individual fixtures or groups of fixtures if desired.

Specification

Item	Description
Radio Frequency Range	915.9 - 917.3 MHz, Integrated Wire Antenna
Wireless Protocol	Proprietary based on IEEE 802.15.4
Encryption	Proprietary based on AES encryption
Rated RF Power Output (W)	11.3 dBm short duration, utilising both frequency hopping and direct sequence spread spectrum
Transmit Range	90m indoors to an Audacy Gateway or Luminaire Controller in a typical commercial building; extended range when repeater mode enabled
Dimming Protocol	0-10V (linear dimming profile, meets IEC60929 Annex E)
Input Voltage	240V AC
Rated Current	6A
Rated Load Wattage	1440W
Operating Temperature	10°C to 70°C
Installation Environment	Indoor use only
Mounting	Directly to junction box or fixture via M20 knockout
Dimming Wire Placement	Within nipple for internal connection
Colour	Black
Dimensions	69.6mm x 61.5mm x 106.7mm, antenna fully extended
Weight	130.4g

Remote Switch

59-SS1200UK

Using our exclusive maintenance-free technology, the Audacy® Remote Switch wirelessly controls light fixtures equipped with Audacy Luminaire Controllers, providing onsite control of your system-enabled light fixtures or groupings.

Simplicity Is the Rule
The Audacy Remote Switch is wireless and simple to install anywhere or use as a handheld switch for remote convenience. The innovative, capacitive touch panel will adjust to your desired setting at the touch of a finger. The Audacy Remote Switch operates in the highly reliable 915 MHz spectrum.

Adaptability at Your Fingertips
Used in conjunction with the Audacy Wireless Controls system, the Remote Switch permits onsite employees to customize their lighting environments by overriding the master inputs of your Audacy Interface. The Remote Switch turns lights on or off and enables 0-10V dimming.

Because Time Is Money
As with all Audacy Wireless Controls system components, the Audacy Remote Switch vastly reduces installation time and costs versus a typical wired system alternative. And you have the flexibility to place it anywhere you choose because there are no wires to run.

👁 Light Sensor

59-LSC1400UK

Using our exclusive maintenance-free technology, the Audacy® Light Sensors wirelessly adjusts brightness to harvest maximum daylight.

How It Works
Put simply, the Audacy Light Sensors detect ambient light in a designated space and send measurements to your Audacy Wireless Gateway.

EVERYTHING's Under control
Your inputs to the Audacy Interface inform a system that determines which groups of light fixtures – equipped with Audacy Luminaire Controllers – dim or brighten based on ambient light throughout the day.

Simplicity is the rule
Wireless and simple to install almost anywhere, Audacy Light Sensors operate in the highly reliable 915 MHz spectrum. Light Sensors easily help facilitate compliance with the newest requirements.

Because Time Is Money
As with all Audacy Wireless Controls system components, the Audacy Light Sensors vastly reduce installation time and costs versus a typical wired system alternative. You even have the flexibility to place it anywhere you choose, because there are no wires to run.
